

logarithm. W_a -Empfindlichkeit $\log W_a = \log W_o$

$$W_a = (T_a \cdot D_a)^{0,5}$$

$$\log T_a = \log T_o + 0.28$$

$$\log W_a = (\log T_a + \log D_a) / 2 \quad \log D_a = \log D_o + 0.28$$

$$\log [W_a, T_a, D_a]$$

Adaptation: $\lambda_{TD}=495$
