

logarithm. N_a -Empfindlichkeit

$$N_a = (U_a \cdot T_a)^{0,5}$$

$$\log N_a = (\log U_a + \log T_a) / 2$$

$$\log [N_a, U_a, T_a]$$

$\log N_a = \log N_o$

$$\log U_a = \log U_o + 1.16$$

$$\log T_a = \log T_o - 0.39$$

Adaptation: $\lambda_{UT}=450$
