

logarithm. U_a -Empfindlichkeit $\log U_a = \log U_o$

$$U_a = (\textcolor{blue}{U_a} \cdot T_a)^{0,5}$$

$$\log U_a = \log U_o + 0.06$$

$$\log U_a = (\log U_a + \log T_a) / 2 \quad \log T_a = \log T_o + 0.72$$

$$\log [U_a, U_a, T_a] \quad \text{Adaptation: } \lambda_{UT} = 525$$
