

Beziehung rgb^* und relative Buntheit $c^*_{rgb^*}$ und Dreiecks-Helligkeit $t^*_{rgb^*}$

System: ORS18a

$$c^*_{rgb^*} = \max (rgb^*) - \min (rgb^*)$$

Buntnon: $h^*_J = 92/360; h^*_B = 272/360$

$$n^* = 1 - \max (rgb^*) = 1 - i^*$$

Ergebnis: $c^*_{rgb^*} = c^*$; $t^*_{rgb^*} = t^*$

$$w^* = \min (rgb^*) = 1 - d^*$$
