

logarithmic W_a -data

$$W_a = (J_o \cdot B_o)^{0,5}$$

$$\log W_a = (\log J_o + \log B_o) / 2$$

$\log [W_a, J_o, B_o]$

$$u_\lambda = (\lambda - 575) / 50$$

$$\log J_o = -0,35 [u_\lambda - u_{575}]^2$$

$$\log B_o = -0,35 [u_\lambda - u_{475}]^2$$

Adaptation: $\lambda_{JB} = 525$
