

$\Delta L_r = |L_{r2} - L_{r1}|$ = Relative luminance difference

$$\log(\Delta L_r) = \log(|L_{r2} - L_{r1}|)$$

Samples:
adjacent

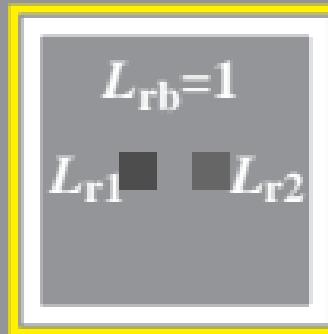

Weber law:

$$\log(\Delta L_{rw}) = \log L_r$$

$$\Delta L_{rw} / L_r = \text{const}$$

Samples:
separated

Stevens law:

$$\log(\Delta L_{rs}) = 0,5 \log L_r$$

$$\Delta L_{rs} = \text{const} L_r^{0,5}$$

$$\begin{aligned}L_r &= L/L_b \\L_b &= 50 \text{ cd/m}^2\end{aligned}$$

combine laws:

$$\log L_{aw} = 1,0 \log L_r$$
$$\log L_{as} = 0,5 \log L_r$$
