

Linear relation olv^* and relative chroma $c^*_{olv^*}$ and triangle lightness $t^*_{olv^*}$

System: SRS18

$$c^*_{olv^*} = \max(olv^*) - \min(olv^*)$$

Hue: $h^*_{\text{O}} = 38/360$; $h^*_{\text{C}} = 236/360$

$$\mu^* \equiv 1 - \max_i (\alpha_i v^*) = 1 - j^*$$

Result: $c^*_{\text{poly*}} = c^*_{\text{lab*}}$; $t^*_{\text{poly*}} = t^*_{\text{lab*}}$

$$w^* = \min(ab^*) = -1 = d^*$$
