

logarithmic B_a , B_o -data

$$\log B_a = (\log S_o + \log G_o) / 2$$

$$\log B_o = \log B_a + 0,35$$

$$\log [S_o / B_a, G_o / B_a]$$

420 470 520

$$u_\lambda = (\lambda - 550) / 50$$

$$\log S_o = -0,35[u_\lambda - u_{420}]^2$$

$$\log G_o = -0,35[u_\lambda - u_{520}]^2$$

Adaptation: $\lambda_{SG} = 470$
