

CIELAB_v 2022 L^{*v} a^{*v} b^{*v} -Farbraum

Definition und Umkehrung ($X_v/X_n=Y_v/Y_n=Z_v/Z_n=0,1841$)

$$L^{*v} = v_L \left(Y/Y_v \right)^{1/3} - 16 = L^*_{\text{CIELAB}}$$

$$a^{*v} = v_a \left[\left(X/X_v \right)^{1/3} - \left(Y/Y_v \right)^{1/3} \right] = a^*_{\text{CIELAB}}$$

$$b^{*v} = v_b \left[\left(Y/Y_v \right)^{1/3} - \left(Z/Z_v \right)^{1/3} \right] = b^*_{\text{CIELAB}}$$

$$X = X_v \left[\left(L^{*v} + 16 \right) / v_L + a^{*v} / v_a \right]^3$$

$$Y = Y_v \left[\left(L^{*v} + 16 \right) / v_L \right]^3 \quad Y_v = 18,41$$

$$Z = Z_v \left[\left(L^{*v} + 16 \right) / v_L - b^{*v} / v_b \right]^3$$

$$c_v = [Y_v/Y_n]^{1/3} = 0,1841^{1/3} = 0,5689, \text{ ähnlich für } X, Z$$

$$v_L = 116c_v = 66, \quad v_a = 500c_v = 284,56, \quad v_b = 200c_v = 113,78$$
