TUB-test chart DE69; 4 CIE and 2 R17M observers, colorimetric calculations of chromatic values  
purity definition:  $a=2.5[x/y]$ ,  $b=-1.0[z/y]$

Figure 1 consists of two chromaticity diagrams. The top diagram is the CIE 1931 chromaticity diagram, showing the color gamut of the D50 illuminant. The axes are labeled  $u^*$  and  $v^*$ . The bottom diagram is the CIE 1964 chromaticity diagram, also showing the color gamut of the D50 illuminant. The axes are labeled  $u^*$  and  $v^*$ . Both diagrams show a closed curve representing the color gamut, with points labeled A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z. The axes are labeled  $u^*$  and  $v^*$ .

purity definition:  $a=2,5[x/y]$ ,  $b=-1,0[z/y]$

TUB-test chart DE69; 4 CIE and 2 R17M observers, colorimetric calculations of chromatic values  
purity definition:  $a=2.5[x/y]$ ,  $b=-1.0[z/y]$

Figure 1 consists of two panels, (a) and (b), showing the evolution of the logarithm of the mass function slope,  $\log P_m$ , as a function of redshift  $z$ . The x-axis for both panels is redshift  $z$ , ranging from 0 to 1000. The y-axis is  $\log P_m$ , ranging from -1.0 to 2.5. Panel (a) shows results from the B17M AG 1B model, and panel (b) shows results from the B17M AG 1B model with radiative corrections. Both panels plot  $\log P_m$  for various models (red, green, blue, black) and compare them with observational data points (circles, triangles, squares). The top panel includes labels for various models (G, Y, H, B) and their corresponding  $P_m$  values at different redshifts. The bottom panel includes labels for various models (Y, G, H, B) and their corresponding  $P_m$  values at different redshifts.

$\lambda_{c,R,G,Y,R} = 475, 503, 574, 494, 4\text{ nm}$   
 Outward colours (c),  $\gamma_{c,R} = 100, 0$   
 max (m) chromatic value, D50  
 chroma ( $A^*_{cp}, B^*_{cp}$ )

$\lambda_{c,R,G,Y,R} = 475, 503, 574, 494, 4\text{ nm}$   
 Outward colours (c),  $\gamma_{c,R} = 100, 0$   
 max (m) chromatic value, D50  
 chromatic value ( $A_p, B_p$ )
