

colour space (C^*_{AB} , L^*), see Table 4, <http://farbe.li.tu-berlin.de/color/ES15.PDF>

Eigen chroma $E^*=p^*_{mF} L^*_F=100$, and Eigen lightness $L^*_F=94,8$

Gegen chroma $G^* = -p^*_{\text{mG}}$, $L^*_{\text{G}} = -100$, and Gegen lightness $L^*_{\text{G}} = 31,6$

Eigen purity: $p^*_{ME} = C^*_{AB,E}/L^*_E = 100/94,8 = 1,0$

Gegen purity: $p^*_{\text{D+G}} = -C^*_{\text{AB,E}}/L^*_G = -100/31,6 = 3,1$

Lightness: $L^* = 10Y^{1/2}$, $0 \leq Y \leq 100$
