

**Colorimetric workflow: digital input → printer → analog output
based on the ergonomic Standard ISO 9241-306:2018 for work places**

In this default case the printer driver has the relative gamma $\gamma = 1,000$.

relative gamma	digital input	printer driver	relative gamma	analog output	output contrast	ISO output
2,105			2,105			
1,818			1,818		>288:1	NO
1,600			1,600			
1,428			1,428			
1,290			1,290		>288:1	NO
