

logarithm. W_a -Daten

$$W_a = (J_o \cdot B_o)^{0,5}$$

$$u_\lambda = (\lambda - 575) / 50$$

$$\log J_o = -0,35[u_\lambda - u_{575}]^2$$

$$\log W_a = (\log J_o + \log B_o) / 2 \quad \log B_o = -0,35[u_\lambda - u_{475}]^2$$

$\log [W_a, J_o, B_o]$

Adaptation: $\lambda_{JB} = 525$
