

logarithmische U -Empfindlichkeit

$$U = (P \times D)^{0,5}$$

$$\ln P = [c \cdot \lambda - c \cdot 570]_2^2$$

$$\ln U = (\ln P + \ln D) / 2$$

$$\ln D = [c \cdot \lambda - c \cdot 545]_2^2$$

$$\log [U, P, D]$$

$$\text{Adaptation: } u = 0$$
