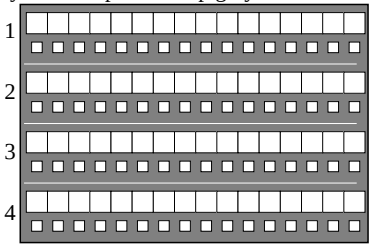
application for output of displays: monitor systems or data projector systems

Equality of grey series by four grey definitions (Yes/No decision)

Layout example: 16 step grey series with four grey definitions



Black N 16 steps White W

There are two basic colours on each page:
Black N and White W in mean grey background.

There are adjacent (upper row)
and separate grey samples (lower row).
This gives eight grey series.

In each colunme the four adjacent greys
should be equal.

The four grey series are defined by four
different PS-operators.

This test uses only the four upper adjacent grey series N−W.
For the upper grey series and in each columne the four greys should be equal for **all** the 16 steps.

Are in each columne the four greys for all the 16 steps equal? **underline: Yes/No**

Only in case of "No":

Is row no. 3 most different compared to all others ? underline: Yes/No
Are the series no. 1, no. 2, and no. 4 equal? underline: Yes/No

Only in case of "No":

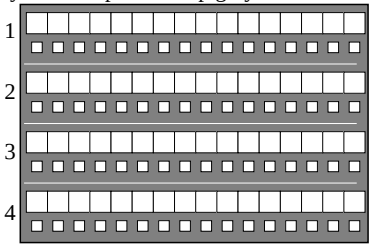
Are the rows no. 2 and no. 4 equal ? underline: Yes/No

Remarks, e. q. other equality: .....
.....

Part 1 OE840−3N-030-1

Discriminability of 16 step grey series by four grey definitions (Yes/No decision)

Layout example: 16 step grey series with four grey definitions



Black N 16 steps, 15 differences White W

There are two basic colours on each page:
Black N and White W in mean grey background.

There are adjacent (upper row)
and separate grey samples (lower row).
This gives eight grey series.

The adjacent and separated are identical.
Separated greys are less distiguishable.

Any grey colour is defined by four different
PS-operators in four rows

All the 16 steps of the eight series N−W should be distinguishable
Are all 15 grey differences of the eight rows distinguishable? **underline: Yes/No**

Only in case of "No":
Test of adjacent grey samples (four upper rows):
Are the 15 grey differences of the four series distinguishable? underline: Yes/No
Only in case of "No":
Are the 15 grey differences of series no. 1 distinguishable? underline: Yes/No
Are the 15 grey differences of series no. 2 distinguishable? underline: Yes/No
Are the 15 grey differences of series no. 3 distinguishable? underline: Yes/No
Are the 15 grey differences of series no. 4 distinguishable? underline: Yes/No

Part 3 OE840−7N-030-1

Documentation of assessor colour vision properties for visual assessment

The assessor has **normal** colour vision according to one test: **underline Yes/No**
either according to DIN 6160:1996 with Anomaloskop of *Nagel* **underline Yes/unknown**
or with test charts using colour points according to *Ishihara* **underline Yes/unknown**
or tested with, please specify: ..... **underline Yes/unknown**

For visual evaluation of the display (monitor, data projector) output

Office workplace illumination is daylight (clouded/north sky) **underline Yes/No**
PDF file: http://130.149.60.45/farbmetrik/OE84/OE84F1P2.PDF **underline Yes/No**
PS file: http://130.149.60.45/farbmetrik/OE84/OE84F1P2.PS **underline Yes/No**
Picture A7-030-2: **contrast range:** (>F:0) (F:0) (E:0) (D:0) (C:0) (A:0) (9:0) (7:0) (5:0) (3:0) (<3:0)
compare standard print output according to ISO/IEC 15775 with range F:0 **underline range**
Remark: In daylighted offices the contrast range is in many cases:
on display between: >F:0 and E:0 (monitor), D:0 and 3:0 (data projector)
