

Device and elementary colours, $Y_w=88,6$
of the offset colour space for D65
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for D50
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for P40
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for A00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for E00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for C00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for P00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for Q00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for D65
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for D50
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for P40
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for A00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for C00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for P00
in the chromaticity diagram (x, y)

Device and elementary colours, $Y_w=88,6$
of the offset colour space for Q00
in the chromaticity diagram (x, y)
