

logarithm. G_a -Daten

$$G_a = (M_o \cdot C_o)^{0,5}$$

$$\log G_a = (\log M_o + \log C_o) / 2 \quad \log C_o = -0,35[u_\lambda - u_{545}]^2$$

$$\log [G_a, M_o, C_o]$$

$$u_\lambda = (\lambda - 555) / 50$$

$$\log M_o = -0,35[u_\lambda - u_{495}]^2$$

Adaptation: $\lambda_{MC}=520$
