Table with 28 columns (A-Z) and 28 rows (01-27). Each cell contains a 2x2 grid of numerical values representing color differences (delta E) between adjacent color patches. The values are organized into a grid that allows for visual comparison of color transitions across the spectrum.

Table with 28 columns (A-Z) and 28 rows (01-27). Each cell contains 28 numerical values representing color data for a specific color and row. The values are arranged in a grid pattern, with some cells highlighted in red. The columns are labeled A through Z, and the rows are labeled 01 through 27. The data represents the color characteristics of the TUB material under various conditions.
