

$\log(\Delta Y/\Delta Y_u)$  CIE tristimulus value difference

$\Delta Y/\Delta Y_u$

$\Delta Y$  normalized to  $\Delta Y_u$

2  $100L^*_{85,2} = (t/a) \ln(1 + a \cdot Y)$  [1d]

$a=0,3411$   $t=88,23$   $t/a=258,6$   $b=6,141$  [2d]

normalized tristimulus value  $Y$  difference

$dY/dY_u = (1 + a \cdot Y) / (1 + a \cdot Y_u)$  [3d]
