

### Colour management for output linearization of a 9 step grey scale

### Colour management for output linearization of a 9 step grey scale

heh40-3n

heh41-3n

Three, 5 and 9 colour steps for visual evaluation s: 0, 125, 250, 375, 500, 625, 750, 875, 1000  $L^*_{TUBLOG,U}=[50/\log(5)] \log(Y/Y_U)+50, Y_N=4, Y_U=20, Y_W=100$   
 Black N00r – Black N16r = Red R

Three, 5 and 9 colour steps, numeric specification

|                      |                                    |                      |                      |                                       |                                 |  |                      |                      |                                       |                                 |   |                                 |   |                                 |  |                      |
