

$F_{ab}(x_r)$ = achromatic receptor responses N, W

$$F_{ab}(x_r) = b \frac{e^{x_r/a} - e^{-x_r/a}}{e^{x_r/a} + e^{-x_r/a}} \quad \begin{matrix} a=-1,00, b=0,50 \\ a=1,00, b=0,50 \end{matrix}$$

$$dF_{ab}(x_r)/dx_r = 4b/[a\{e^{x_r/a} + e^{-x_r/a}\}^2]$$
