

Derivation of achromatic receptor response

$$F'_{ab}[x_r/a] \quad x_r = \log(\text{relative luminance})$$

with $x_r = \log [L/L_u]$ ($L = \text{test luminance}$)

$L_u = \text{surround luminance}$

$$F'_{ab}[x_r/a] = \frac{4b}{a \{ e^{x_r/a} + e^{-x_r/a} \}^2} = \frac{b}{a \sinh^2[x_r/a]}$$

function values for $b=1$ and $a>0$:

$$F'_{a1}[x_r/a \rightarrow -\infty] = 0 \quad x = \log L, \quad u = \log L_u$$

$$F'_{a1}[x_r/a = 1] = 1 \quad x_r = \log [L/L_u]$$

$$F'_{a1}[x_r/a \rightarrow +\infty] = 0 \quad = x - u$$
